# Laminator - Slitter-Rewinder

- › **Two complete machines for the price of one**
- › Solvent free laminating
- › Industrial blade or rotary knife slitting
- › Narrow laminating sleeve usability
- › Excellent price versus value
- › Small space requirement
- › Exceptional laminating and slitting quality
- › Swift changeover (15 minutes)
- › Quick ROI
- › Adhesive doser is standard equipment with the laminator
- › Lots of available options
- › Technological support
- › Gearless, servo motor driven laminator cylinder
- › Side shift laminator sleeve with side changeability
- › Servo motor controlled laminator cylinder

## SPECIAL AIR-CYLINDER

The laminating cylinder is an in-built air-cylinder onto which rubber sleeves can be pulled on from the side of the machine with the help of special valves. The rubber sleeve's width is less than the air-cylinder's width and equal to the laminating width.

Laminating width:	500–1500 mm	20–59"
Laminating speed:	200 m/min	655'/min
Slitting speed	400 m/min	1310'/min
